A day in the life of a professional game developer

John's a game developer. He gets up at 6.00 am. He usually makes a strong coffee and checks his email. Then he reads the news and has breakfast. After that, he answers the questions from his social media followers. They always ask lots of questions about videogames software.

Twice a week he usually has online meetings with his team and they discuss their active projects. They sometimes work long hours. Then, he plans and organizes the day. From 10.00 pm to 1.00 pm he designs, codes and tests new games. Sometimes he talks to clients on Skype and learns new tools.

In the afternoon he writes articles for his blog, and finishes the morning work. In the evening, he relaxes, has dinner and plays some Xbox with friends. Then, he goes to bed.
